

## DustMaster Coarse

(Aluminum Oxide, Zinc Stearated, Hook & Loop)

DM Coarse uses a nylon mesh backing material to create a more flexible, durable and consistent abrasive surface. As a result, DM Coarse produces a more consistent surface finish quicker, and because it also has excellent resistance to edge wear and clogging, it lasts longer too.

## DustMaster Silicon Carbide Abrasive

(Silicon Carbide, Non-Stearated, Hook & Loop)

This abrasive's patented texture build-up and multi-hole design allows continuous dust extraction over the entire surface and thus a nearly dust free sanding process. The increased air flow reduces heat and clogging during the entire sanding process. A 6" disc contains approximately 225 holes.
