

Wart Hog EXP Pneumatic HEPA Vac

Designed for use in potentially explosive dust and gas atmospheres and for the removal of coatings containing Hexavalent Chromium (Cr VI), lead, cadmium and other heavy metals, aluminum dust, carbon fiber, ceramic dust, fiberglass and mold. These units feature extra heavy duty components that ensure long life and extreme durability for industrial and military environments.

This Wart Hog EXP HEPA Vacuum incorporates Safe Filter Change unique to Clayton.

This means technicians can open the filter compartment and change the bag filter without protective gear or exposing other workers and environment to hazardous dust.

Features:

- ATEX certified for use in explosive dust and gas atmospheres
- 15 Gal Recovery Capacity
- All stainless steel construction
- Consumes 60 CFM @ 90 PSI
- Provides 100 CFM & 100" H₂O
- Vacuum and accessories are electrically bonded to ensure conductivity during use
- Conductive bonded HEPA filter: Efficiency of 99.97% @ 0.3 μm
- Aluminum compressed air filter and valve
- Quiet at only 79 dBA
- Includes ½" conductive compressed airline with stainless steel fittings

II 2 G D c T6 T85 °C CE
